About

Agencies who utilize eMAR can access reports for eMAR directly through the Main Menu. A list of the reports available within NSS can be found below along with their descriptions. All reports can be exported to Excel by clicking the  button, PDFed by clicking the  button, and data can be grouped by clicking the  button. To group data, a header is displayed where you can drag and drop columns. To filter data within a column, click the filter button

Note: Agencies can mark Medications and Treatments as requiring a patient signature by selecting the **Client Signature Required?** checkbox in **System Setup (Supplemental) > eMAR**. When the **Pass Meds** button is clicked, a window is displayed to collect the patient's signature and lists the Medications/Treatments they are signing off on. Agencies can view if a client signature was collected when accessing this report.

Review History

This report shows Medications that have been reviewed or are pending review.

Pass Variance

The Pass Variance report shows all of the passes that have not been made that should have been made. For example, if a patient was supposed to get a pass for a medication or treatment yesterday at a specific time and they didn't, the patient's name, the pass name, date, and scheduled time is displayed.
