

Treatment Plan FAQs

Last Modified on 08/20/2021 4:21 pm EDT

In the med plan, there are green pluses (+) for adding medications. How do I add them?

The green pluses are a result of syncing medications, sealing a med note will update those medications.

Why can't I manually enter my own outcomes, goals, and objectives in the PCP Wizard?

Select outcomes, goals, and objectives from the template, then personalize those choices under the Details of Personalized Goal.

One of my clients isn't showing up in eMAR. Why?

They either:

- Aren't admitted to a program
- Haven't been prescribed medications through ePrescribe
- Haven't been assigned to a bed in Bed Management
- Aren't accessible to you as a user based on your access

What do the icons in eMAR represent?

In the Medication and Treatment Schedules section of eMAR, icons are displayed next to each Medication or Treatment. If you hover over the icon, it displays the name of the icon. The descriptions of the icons can be found below:

Icon	Description
	PRN: Displays if a medication is a PRN. PRN medications can't be reviewed.
	Medication: Displays if an entry is a non-PRN medication. This icon may be accompanied by the Controlled Substance or Review icons.
	Controlled Substance: Displays if a medication is a controlled substance.
	Sliding Scale: Displays only if a medication is a sliding scale.
	Review: Displays if the medication needs review.
	Treatment: Displays if the entry is a treatment.
