How can I change the dispensing sync computer?

Last Modified on 12/01/2021 8:11 am EST

One computer per server is designated as the sync computer for dispensing. To change the dispensing sync computer:

1. Navigate to Setup: **Dispensing Module > Utilities > Setup**.
2. Select the **Cloud Sync on this Computer** checkbox.
3. Click the **Update** button. "Successfully updated" is displayed after the update has been saved.
