

What do the Security Levels mean in the Employee / Contractor Form?

Last Modified on 09/20/2023 9:49 am EDT

In the Employee/Contractor Form in NSS Billing, the security level **S** = Supervisor, and any user with this designation can change configuration options in the system and delete Line Items. It is recommended that this only be used for a Supervisor/Head Biller.

For all other users, leave this field **blank** and they will not have the ability to change configuration options or delete Line Items.

Note: The **T** and **C** options are no longer used.
