

# Bundle Services Overview

Last Modified on 05/22/2023 5:04 pm EDT

## About

NextStep Billing is introducing a new tool that will allow NSS billers to bundle multiple Activities or Services into a new “Bundled” service for billing.

We recommend that users set up “Base” Activity codes, which are Activity codes that will not be billed out, rather, they will be used to identify services or activities that will be included in a bundled service for billing.

- This will be useful when billing a week's worth of activities into a single service for payers or insurances that require it to be billed that way.
- This will also be useful for services that can be billed based on time and take place multiple times throughout the day.

Each Activity can be tracked and sent to the NSS Billing System separately and then bundled into one daily bundled service for billing.
