11.5.4 Hotfix Release Notes

Last Modified on 12/05/2023 2:29 pm EST

Bugs Fixed:

Release 11.5.4	
Auth Tracker causing pages to not open (displays an error)	Some users were experiencing an error when trying to open pages enabled with the Authorization Tracker. Now fixed, users will be able to access any pages with the Auth Tracker.
Incorrect Payer Information in Client Details panel	Under some circumstances users were seeing the wrong payer information in the left-side Client Details panel for the selected client. Now fixed, users will see their selected clients' primary insurance payer in the Client Details panel.
