

# NextStep Clinical 11.7 Release Notes

Last Modified on 04/25/2024 5:14 pm EDT

## 11.7.3 Release Notes - Hotfix

Released: 4/25/2024

### Issues Resolved:

Release 11.7.3	
<b>Error When Finalizing or Signing Notes</b>	Users were reporting that their Chart/Progress Notes were returning an error when a second user attempted to edit then save that note. This issue has been resolved and users will be able to Finalize or Sign Chart/Progress Notes as expected.

## 11.7.2 Release Notes - Hotfix

Released: 4/23/2024

### Issues Resolved:

Release 11.7.2	
<b>Error Attempting to go to 2nd Page of PCP/ Treatment Plan</b>	Users were getting an error for some clients when attempting to navigate to step 2 of the Treatment Plan Builder / PCP Wizard. This issue has been resolved and users are now able to progress through treatment planning as expected.

## 11.7.1 Release Notes

Release date (all agencies): **4/21/2024**

### 11.7.1 Issues Resolved:

## Release 11.7.1

### "Out of Memory" error when sealing forms

Version 11.7.0 introduced an issue where some users experienced an Out Of Memory error when sealing forms. This issue has been resolved.

## 11.7.0 Beta Release Notes

Release date (beta agencies): 4/14/2024

### New Features:

Release 11.7.0	
<b>Supervisor Signature blocks billing and creates a reminder</b>	<p>NextStep now supports requiring a supervisor signature on notes and forms before billing can be sent. Admins can assign a Supervisor to a user in Maintain Users, as well as check a new permission called Require supervisor sign-off.</p> <p>From then on, when that user seals or finalizes a form or note, the billing information does not send to billing until their designated supervisor signs off.</p> <p>Those designated as supervisors will see a new section on their Reminders List, called Supervision, upon receiving these automatic signature requests. Clicking the form or note will pop up a new window, where the supervisor can read and then sign that form or note.</p>
<b>"Program" filter on the Treatment Plan Wizard</b>	<p>Users now have the ability to narrow down the Goals visible in the treatment plan builder by Program. This is helpful for users who want to make decisions about their client's treatment but not interfere with other programs' decisions.</p>
<b>Form Setup: Deleted Forms Can Be Reenabled</b>	<p>Form Setup/Form Builder users now have the ability to reenable a form that was previously discontinued.</p> <p>Navigate to Admin Tools -&gt; Form Setup (or Form Builder) to see discontinued forms displayed below any active (in use) forms in the dropdown of forms. Select a Discontinued form, and click the new Reenable button to reenable that form.</p>

### Issues Resolved:

# WHAT'S NEW

Release 11.7.0	
<b>Treatment Plan printable page displaying problems and goals incorrectly</b>	High-complexity treatment plans were causing the printable version of treatment plans to display goals as addressing problems they weren't. This has been fixed and now for a given problem, only its associated goals will display.
<b>Document Center Vitals Report: Chronological Order</b>	Vitals in the Document Center's Vitals Report now display in reverse chronological order. Prior to this change, they were not shown in chronological order.
