11.6.7 Hotfix Release Notes

Release Timeline:

- **Likely Release**: 3/10/2024

11.6.7 Bugs Fixed:

Release 11.6.7	
Reminders List Not Popping Up At Sign In	Agencies who disabled the Reminders Badge were no longer seeing their Reminders List pop-up upon logging into the software. This has been fixed and the Reminders List will pop up as expected.
Enrollment Cases being Reopened	Agencies using the Enrollment feature were sometimes having a client's old episode of care reopened instead of being readmitted under a new episode. Going forward users will only be able to reopen a closed episode of care via the Document Center (assuming they have permission).
Client Demographics Dashboard	A bug in the new demographics dashboard caused a last-minute pull from the general release. This bug has been fixed and users with access to Administrative Reports will now see a **Client Demographics** Dashboard.
