## Services Preprocessor

Last Modified on 09/04/2024 4:41 pm EDT

#### Path: File > Services > Services > Services - Preprocessor Form

### About

The Services Preprocessor Form uses the rules entered into the Activity Code Bundle Setup to create a new billable service for open Line items associated with the **Base Activity Code**.

The only required filters are the **Beginning** and **Ending** date range. Other filter options are available by clicking the**Filters** button. The Services Preprocessor will only combine services within the entered date range so be sure to be exclusive or inclusive here.

Services that have a Base Activity Code added to the Activity Code Bundle Setup must have a Bill Status of 0 to appear in the Services Preprocessor previewed list. The user must Recalc in the Services Form **before** Generating in the Services Preprocessor.

#### Preview in the Services Preprocessor

After entering your Filters, click Preview.

The form displays two grids:

- The top grid, labeled Records To Be Bundled shows the final/substituted codes.
- The bottom grid, labeled Base Records displays which Line Items are included in the Records To Be Bundled.

#### Generate in the Services Preprocessor

After reviewing the Previewed Records, click Generate. A pop-up will let you know how many Records have been Generated.

To complete the process for the new Bundled Activity Code, the Services must be Recalced to a Bill Status of 0 to create a Line Item for the Bundled Activity Code.
