NextStep Dispensing 1.7.0 Release Notes - Beta

Version 1.7.0 release date: 12/8/2024

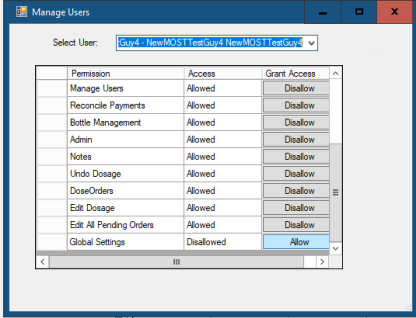

Feature Enhancements:

Release 1.7.0									
<p>Alert Templates can link to a Dose Order's expiration date</p>	<p><i>Dispensing > Utilities > Global Settings > Alert Templates</i></p> <p>Users can define Alert Templates that can be linked to Dose Orders. Each item in the template can be set to key off either the dose order's start date or its expiration date.</p>  <table border="1"><thead><tr><th>Alert Type</th><th>Day</th><th>Template Note</th><th>Alert Effective Days From</th></tr></thead><tbody><tr><td>Client Communication Soft Hold</td><td>7</td><td>Dose Order expiring soon - check with Provider</td><td><input type="radio"/> Start <input checked="" type="radio"/> Expiration</td></tr></tbody></table>	Alert Type	Day	Template Note	Alert Effective Days From	Client Communication Soft Hold	7	Dose Order expiring soon - check with Provider	<input type="radio"/> Start <input checked="" type="radio"/> Expiration
Alert Type	Day	Template Note	Alert Effective Days From						
Client Communication Soft Hold	7	Dose Order expiring soon - check with Provider	<input type="radio"/> Start <input checked="" type="radio"/> Expiration						
<p>User ID and Location display on screens</p>	<p>The Dispensing screens now display a note in the lower right corner showing who is logged in and from what location</p> 								

NOT YET STARTED

Issues Resolved:

Release 1.7.0																																		
Syncing Improvement	Syncing has improved to correct a past issue with dose order updates being overwritten.																																	
Posting a dose order that had been pending updates appropriately	In the past, if a User created a dose order without posting it, when they returned to that pending dose order, made updates, and clicked Post Order Now , the settings for the screens were not updated properly and the dose order might come up later via View Order/AWL as editable instead of read-only. This issue has been resolved.																																	
Improved interaction on Manage User permissions	<p><i>Dispensing > Menu > Manage Users</i></p> <p>In the past, when a User was setting permissions for an account via the Manage Users feature, the interface forced unnecessary scrolling by jumping to the top as each permission was clicked to change it.</p> <p>This issue has been resolved.</p>  <table border="1" data-bbox="403 790 820 1106"><thead><tr><th>Permission</th><th>Access</th><th>Grant Access</th></tr></thead><tbody><tr><td>Manage Users</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Reconcile Payments</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Bottle Management</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Admin</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Notes</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Undo Dosage</td><td>Allowed</td><td>Disallow</td></tr><tr><td>DoseOrders</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Edit Dosage</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Edit All Pending Orders</td><td>Allowed</td><td>Disallow</td></tr><tr><td>Global Settings</td><td>Disallowed</td><td>Allow</td></tr></tbody></table>	Permission	Access	Grant Access	Manage Users	Allowed	Disallow	Reconcile Payments	Allowed	Disallow	Bottle Management	Allowed	Disallow	Admin	Allowed	Disallow	Notes	Allowed	Disallow	Undo Dosage	Allowed	Disallow	DoseOrders	Allowed	Disallow	Edit Dosage	Allowed	Disallow	Edit All Pending Orders	Allowed	Disallow	Global Settings	Disallowed	Allow
