NextStep Clinical 11.12 Release Notes

Last Modified on 12/11/2024 4:44 pm EST

Note: Where paths or screenshots are provided with the descriptions, the naming conventions used are those from NextStep's standard configuration. If your agency has customized names and menu placements, what users see on their screens may differ.

11.12.0 Release Notes

Estimated Release Dates:

Beta: 12/8/24

General: 12/15/24

Feature Enhancements:

Release 11.12.0	
Person Icon when Navigation Panel collapsed	A person icon has been added to the NextStep navigation panel when it is in the collapsed view so that Users can expand and collapse the Client Demographics frame without having to re-expand the navigation panel. Allow Field Reference to Total fields	*Main Menu > Admin Tools > Form Setup* When using the Form Builder, you can now create a field reference to a Total, Average, Count or Min Max field. And you can reference these types of fields from a Text, Field Reference Only, Memo, Integer, Double type fields. This would allow you to, for example, show a PHQ9 score in another form.
Residential Roster dashboard available	*Main Menu > Reports > Administrative Reports > Administration > Residential Roster Dashboard* A new dashboard is available to facilitate monitoring information about Client placements and space availability at the various locations within an Agency.
Password policy and support improvements	A consistent password policy has been implemented between Clinical and Portal users with prompts displayed on the Reset Password screens to show Users what rules must be met for new passwords. The text on the Forgot Password screen has been reformatted for improved readability.
Billing Line Items report enhanced - Control Date added	*Main Menu > Practice Management > Billing Reports > Billing Line Items* The Control Date from Billing has been added as a new column in the clinical Billing Line Items report. The Control Date has also been added as a filter parameter for this report.

Issues Resolved:

Release 11.12.0	

Release 11.12.0	
Authorization Units decreasing accurately in Group Notes	Previously, when authorization units were added to the corresponding billing field in a Group Note, and if the Group Note was exited and reentered; the units would not count down in the Authorization Tracker widget. This issue has been resolved.
Line Item AR by Date Type calculates properly	*Main Menu > Practice Management > Billing Reports > Line Item AR by Date Type* The adjusted, payment, and balance columns have been updated to accurately reflect the amounts shown in billing. Previously those columns had formulas that were dependent on the end date set on the dashboard, which led to discrepancies in values between the report and billing. That has been fixed.
Modifiers displaying correctly with Line Items in report	*Main Menu > Practice Management > Billing Reports > Billing Line Items* Previously, not all modifiers connected to a Line Item in Billing were shown in the modifier columns in the clinical Billing Line Item report. This issue has been resolved. Connected modifiers should now populate in the clinical report.
