Issues Resolved:

Release 11.13.1

WHAT'S NEW

Release 11.13.1	
Form Referencing Pulling New Signatures to Previous Forms	When a form is set to Duplicate Previous Copy , fields of type Signature will no longer be copied to new instances of that form. This also fixes an issue where a signature in newer instances of a form could have appeared on an older instance.
eMAR pass editing updated; edited information now correctly carried into reports	In the past, a user could make edits to information about a medication pass that were not picked up on some reports. This issue has been resolved.
