## 7.12.1 Release Notes - Hotfix

Last Modified on 04/30/2025 12:25 pm EDT

Expected Hotfix Release Date: **Monday, 05/05/25**

### Issues Resolved:

Release 7.12.1	
<b>Internal Error when Posting from the Working Queue</b>	<p><i>Navigation Form &gt; 835 Form &gt; Working Queue</i></p> <p>Previously, users would get an internal error when trying to <b>Post</b> to a client's open line using the Working Queue. This has been resolved. There was also an issue with the <b>Reprocess</b> and <b>Reprocess Selected</b> buttons, causing an internal error if the Working Queue line had no associated remark codes. This issue has also been resolved.</p>
<b>Bundling: Restricting "Base" Line Item Access</b>	<p>New guardrails have been put in place to:</p> <ul style="list-style-type: none"><li>• Not allow auto-posting from the 835 Form on the "Base" Activity Code's Line Item</li><li>• Not allow the user to edit a "Base" Activity Code's Line Item</li></ul> <p>Additionally, the Line Item Form now has a field labeled <b>Type</b> to display if the line is "Normal," "Base," or "Bundled."</p> <p><b>NOTE:</b> What was previously known as the <i>Line Item Type</i> is now labeled as the <b>Source</b>.</p>
