Issues Resolved:

Release 7.15.1	
Insurance Override By Activity Code Form error	In the 7.15.0 billing release , fields were added to the Insurance Override By Activity Code Form. If this form had prior override records, the system created an error when creating an 837 file for those matching records. This has been resolved.
Client Insurance pushed to the Scheduler error	In the 7.15.0 billing release , Client Insurance records from NextStep Billing will be synced to the Insurance Information field of the Scheduler. This error occurred due to agencies that don't have the Scheduler enabled. This has been resolved.
