Feature Enhancements:

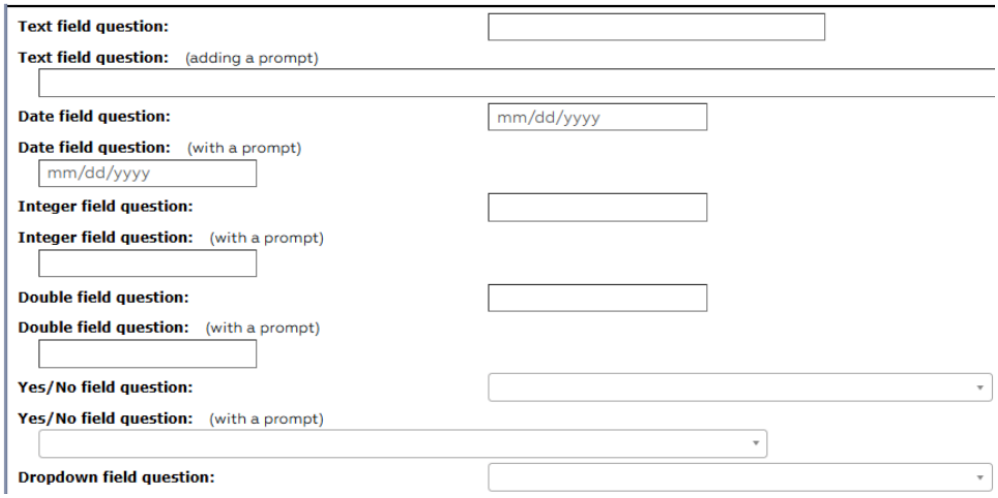

Release 11.21.1	

Improved Form Readability

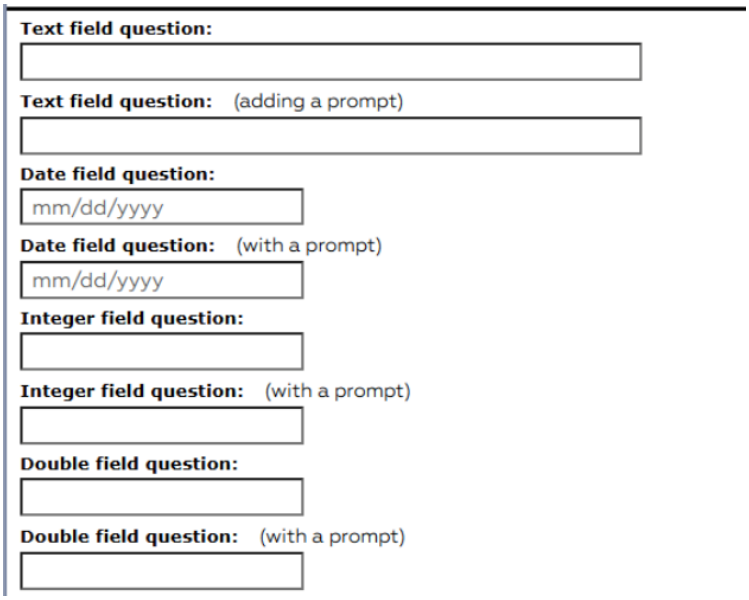

To improve the readability of forms and notes, the following field types now are aligned when viewing and editing a form or note

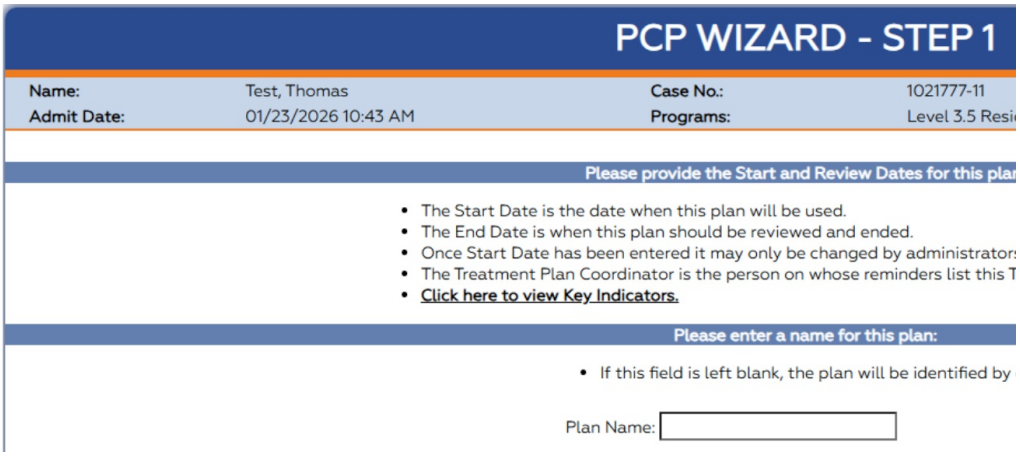

- Text
- Integer
- Double
- Date
- Yes/No
- Select All That Apply
- Select One Only
- Dropdown
- Dropdown Templates

Before

After

Sealed by in the Document Center	*Main Menu > Reports > Document Center* You can now view the sealed status of a form in the document center.
Plan Name on Master Treatment Plan	*Main Menu > Treatment Planning > PCP Wizard* You can now assign a unique name to all Treatment Plans upon creation. 
Add Date of Service filter to "Deleted Services" report	*Main Menu > Practice Management > Billing Reports > Deleted Services* The Deleted Services report now includes the option to filter by the Date of Service.
Out Of Office on Activity Codes	*Scheduler > Setup > Locations and Activities > Activities* You can now set that an Activity Type indicates the resource is Out of Office. This will be used on a future release of the Productivity Dashboard.
Maintain Field References when Duplicating a Form	*Main Menu > Admin Tools > Form Builder* When duplicating a form in Form Builder, any existing field references pointing to the original form will now automatically be applied to the newly created copy.
Improve Searching	The Help Center now understands natural language, context, and intent so users can now search similar to how they think.

Issues Resolved:

Release 11.21.1	
Do Not Display Custom Face Sheet Roles Upon Discharge	*Main Menu > Admissions > Face Sheet* There was an issue where, after clients are discharged, all custom roles added to the Face Sheet remain filled out. This issue has been addressed.
Note overlap warning for custom Notes	*Main Menu > Admin Tools > Note Setup > Note Configuration* There was an issue where, when you set a custom note to have Time Overlapped checked, after clicking Update Configuration, the checkbox is no longer selected. This issue has been addressed.
Display of Field Reference Only for Standard Demographics	*Main Menu > Admin Tools > Form Setup* There was an issue where if you created a field reference to a Standard Demographic value, and that value had sub values, the field reference showed all the subvalues. This issue has been addressed

Medications marked "as needed for pain" in DrFirst	*Main Menu > Treatment Planning > Medication Plan* There was an issue where medications marked "as needed" in DrFirst were not populating as PRNs in NextStep. This issue has been addressed.
"Select One Only" Required field type billing message	*Main Menu > Treatment Planning > Notes* There was an issue where “Select One Only” fields on a note would sometimes create a pop-up about required Billing fields on that note. This issue has been addressed.
Discharge print paper size	There was an issue where printing a discharge was using a default paper size of A4 instead of standard sizes. This issue has been addressed

Release 11.21.1	
Dropdown Template Widths	Dropdown template fields are now the width of the widest value in the dropdown.
AI Chart Note Issues	*Main Menu >Treatment Plan > Sessions* A "One or more Goals are no longer available ..." error could have a occurred for some clients when generating a Chart Note from an AI Session. There was also an issue where a Narrative Summary for a Progress Note was not always being created from the AI Session. These issues have been resolved.
Maintain Users error when adding 1,000th user	*Main Menu > Maintain Users* There was an error raised when trying to add the 1,000th user to NextStep. This issue has been addressed.
Scheduled Form Reminders	*Main Menu > Reminders* There was an issue with Version 11.21 where some users were mistakenly seeing more schedule form reminders. This issue has been resolved.

Release 11.21.3	
Select client in web scheduler	There was an issue where a user could not select a client in the web scheduler and had to use the hourglass to search. This issue has been resolved.
Form Link field Dropdown width	There was an issue where Form Link field widths were too small to view the contents of the field. This issue has been resolved.
Authorization Number saving	There was an issue in the Authorization Tracker where the Authorization Number would not save. This issue has been resolved.
