**Issues Resolved:**

Release 11.21.0

**Do Not Display Custom Face Sheet Roles Upon Discharge**

*Main Menu > Admissions > Face Sheet*

There was an issue where, after clients are discharged, all custom roles added to the Face Sheet remain filled out. This issue has been addressed.

**Note overlap warning for custom Notes**

*Main Menu > Admin Tools > Note Setup > Note Configuration*

There was an issue where, when you set a custom note to have Time Overlapped checked, after clicking Update Configuration, the checkbox is no longer selected. This issue has been addressed.

**Display of Field Reference Only for Standard Demographics**

*Main Menu > Admin Tools > Form Setup*

There was an issue where if you created a field reference to a Standard Demographic value, and that value had sub values, the field reference showed all the subvalues. This issue has been addressed

**Medications marked "as needed for pain" in DrFirst**

*Main Menu > Treatment Planning > Medication Plan*

There was an issue where medications marked "as needed" in DrFirst were not populating as PRNs in NextStep. This issue has been addressed.

**"Select One Only" Required field type billing message**

*Main Menu > Treatment Planning > Notes*

There was an issue where "Select One Only" fields on a note would sometimes create a pop-up about required Billing fields on that note. This issue has been addressed.

**Discharge print paper size**

There was an issue where printing a discharge was using a default paper size of A4 instead of standard sizes. This issue has been addressed
